

YOUR GLOVE FITTING GUIDE

A handy guide for your reference

Golf glove sizes tend to vary from one manufacturer to the next. To keep things simple we have our range of gloves to align with the same sizes that you will find for all leading conforming golf glove brands.

If you are still unsure, please follow this simple 2-step process to ensure your size selection so you make the correct purchase based on what size glove best fits you.

STEP 1 - MEASURE

Measure the distance from just below the base of your palm to the top of your middle finger as outlined in the below example;

STEP 2 - COMPARE

Compare your measurements to the table below in addition to your normal size to determine your perfect fit. If you are between sizes then we suggest trying the smaller size first as this will stretch with time.

Small	185-193mm
Medium	194-200mm
Med/Large	201-210mm
Large	211-217mm
X-Large	218-225mm

**Please note these are Men's sizes and only intended as a guide. Sizes can very often vary by material type as well.*
